

Uber-Ride-Analysis

The Uber Data Analysis Project aims to explore trip patterns and user behavior using data analysis techniques to extract meaningful insights. The project focuses on identifying peak hours, high-demand locations, trip duration trends, and ride distribution over time. It includes data cleaning, analysis, and building interactive dashboards to support data-driven decision-making and improve service efficiency and user experience 🚗📊

Team Members:

1. Amr Khaled Mahmoud (Python)
2. Mohamed Saber Mahmoud (Power BI)
3. Ahmed Nabil Mohamed (Excel)
4. Alaa Ahmed Mohamed (Python)
5. Mohamed Abdelsalam Abdelfattah (Power BI)

Instructor Name: Kareem Baqli
